

Sources and Preparation of Data for Assessing Trends in Concentrations of Pesticides in Streams of the United States, 1992–2010

U.S. Geological Survey Data Series 655

List of figures in appendix 1

All of the 52 figures in appendix 1 are in the same format, each one representing a different pesticide or degradate. The common caption on each is as follows:

Time-series plots of nondetections [of the chemical of interest] for all sites in the trend dataset showing (1) original reporting levels; (2) rounded reporting levels and, for routine nondetections, reporting levels reassigned to the maximum value of the long-term method detection level (maxLT-MDL); and (3) raised reporting levels adjusted for temporal changes in recovery.

Chemicals corresponding to each figure are as follows:
